

2nd European Panel Products Symposium

21, 22 October 1998

Table of Contents

Session 1: Fundamental Properties

Characterisation of Crack Propagation in Wood Panel Products under Shear Loading <i>RJA Ehart, SE Stanzl-Tschegg and EK Tshegg</i>	1
Dynamics of Wood Composite Mats During Consolidation: Monitoring Density Development During Pressing with an In-situ Density Monitoring System <i>PM Winistorfor, S Wang and WW Moschler Jr</i>	12
The Rheological Behaviour and Dimensional Stability of Steam Treated Particles <i>M Irle, T Adcock and N Sekino</i>	24
The Swelling Stress and Bond Quality of Steam Treated Particles <i>N Sekino, M Inou and M Irle</i>	30

Session 2: Panel Properties

Aspects Regarding the Surface Quality of MDF-Lightboard <i>M Barbu and H Resch</i>	39
The Long-Term Performance of Wood-Based Panels Bonded with Non-Formaldehyde Adhesive Systems <i>P Bonfield, M Fan, E Hinrichsen, P Gressel and C Boehme</i>	48
Property Changes of Particleboard after Hot-Pressing <i>K Kruse and M Ohlmeyer</i>	60
Dimensional Instability of Cement Bonded Particleboard <i>MZ Fan, PW Bonfield, JM Dinwoodie and MC Breese</i>	69
Linear Expansion of Wood-Based Panels – is a Quick Test Possible? <i>A Steffen, E Schwab and C Korte</i>	83

Session 3: Process Technologies

Saving Costs with Process Control Engineering and Statistical Process Optimisation: Uses for Production Managers, Technologists and Operators <i>G Bernardy and B Scherff</i>	95
Process Modelling System for Particleboard Manufacturing, Incorporating Near Infrared Spectroscopy on Dried Wood Particles <i>B Engström, M Hedquist, M Grothage, H Sundström and A Ärlebrandt</i>	107
Continuous Moisture Determination of Wood Board Products using Radio Frequency Dielectric Method <i>C Hanson</i>	115
Recent Advances in Wood Pulp Effluent Treatment and Recovery “Zero Discharge” Plant <i>S Finnemore and T Hackney</i>	125

Session 4: Raw Materials

Straw as an Alternative Raw Material for the Surface Layers of Particleboards <i>AH Grigoriou</i>	133
Panel Products from UF-Bonded Non-wood Fibres – A Viable Proposition? <i>AR McLaughlin and JRB Hague</i>	142
Recycling of Old Wood and Composite Wood Based Articles <i>P Nakos and E Roffael</i>	153

Session 5: Health and Safety, Marketing

Scaring the Public: Patterns in Campaigns against Industrial Processes and Products <i>M Neal</i>	155
The Development of Speciality Products and Markets within the European MDF Industry <i>J Guerin</i>	168
Workplace Air Measurements in the Wood Panel Industry: Isocyanates and Total Inhalable Particulates <i>P Maddison</i>	180

Session 6: Adhesion

Chemical and Physical Interpretation of MDI Cure in Saturated Steam Environments <i>D Harper, M Wolcott and T Rials</i>	193
Binderless Boards by Means of Enzyme Technology <i>C Felby and L Conrad</i>	205
Particleboard Size Distribution and Glue Resin Consumption: How to Spare Costs <i>M Dunky</i>	206
Fire Retardant Reagent in the Composite Board Industry <i>D Galsworthy and J Voortmans</i>	218
Cocondensation of Melamine, Urea and formaldehyde: Fact or Fantasy? <i>JJH Nusselder, VMLJ Aarts, PM Brandts and J Mattheij</i>	224
Affordable Bio-derived Plastics and Binders for the Composite Industry <i>RP Wool, SH Kusefoglu, SN Khot, R Zhao, G Palmese, A Boyd and G Williams</i>	233

Technical Presentation Forum

Fineboard – A New Family of High-Quality Panels from Wood Dust <i>JO Andersson and B Johnsson</i>	237
PERPLAN – A European Project Examining the Long-Term Performance of Wood-Based Panels <i>P Bonfield, M Fan and E Hinrichsen</i>	238
Surface Activation of Lignocellulosics by Chemical Modification <i>NS Çetin and CAS Hill</i>	239
GreCon Density Profile Analyser-Stenograph: Non-Destructive, In-Line, Real-Time Determination of Density Profiles in a Continuous Panelboard Process <i>GreCon, Germany</i>	245

Visualisation and Quantification of Wax on MDF Panels: A Comparison of Emulsion and Molten Waxes <i>RM Ede, A Thumm and BA Coombridge</i>	251
The Manufacture of Wood Fibre Reinforced Cement Composites from <i>Eucalyptus pellita</i> and <i>Acacia mangium</i> Kraft Pulp <i>D Eusebio, R Cabangon, P Warden and R Coutts</i>	252
Development and Production of Laboratory Scale Novel MDF Panels from Composite and Nonwoven Mattresses <i>PR Gillah and MA Irle</i>	253
Wood Adhesives Based on Self-Condensation of Pine Bark Tannins <i>FC Jorge, CP Neto, M Irle, H Gil and JP de Jesus</i>	261
Exploitation of the Shear Properties of Wood-Based Panels <i>VC Kearly</i>	267
The Performance of T & G Joints Subjected to Concentrated Loads <i>O Moarcas and M Irle</i>	268
Thermal Mechanical Analysis of Medium Density Fibreboard <i>CMF Pereira, LMH Carvalho and CAV Costa</i>	269
An Optical Technique for Determination of Layer Thickness Swell of Wood Composites <i>S Wang and PM Winistorfer</i>	275
